Dear Friends & Colleagues,

It is my privilege to welcome you to the International Coronary Congress 2016, New Delhi, India.

AT ICC 2016 we are determined to make the first of its kind comprehensive course on coronary artery disease management where the platform is shared by most eminent cardiac surgeons and cardiologists from the world to give you a complete overview and meet all your unmet needs. The time has come when we have to introspect, leave the controversies and egos behind, and changes our mindset of individualistic approach of coronary artery disease management to more consensus-based approaches. In the light of evidences from recent trials its proved that HEART TEAM is the way forward in the management of cardiovascular diseases be it coronary artery disease or structural heart disease. We hope that this collaborated effort will translate into improved patient care.

This symposium is designed for Cardiac surgeons, interventional cardiologists, clinical cardiologists, general practitioners, nurse practitioners, cath lab technicians, and other healthcare professionals with a special interest in the field of cardiovascular medicine.

We request you to participate and contribute wholeheartedly and your participation will go a long way in making this mega event a GRAND SUCCESS.
